

YEAR-END REPORT 1 APRIL 2024 - 31 MARCH 2025

FOURTH QUARTER (1 JANUARY - 31 MARCH 2025)

- **Net sales** increased by 13 percent and amounted to SEK 5,750 million (5,091).
- **Operating profit before amortisation of intangible non-current assets (EBITA)** increased by 15 percent and amounted to SEK 880 million (763) corresponding to an EBITA margin of 15.3 percent (15.0).
- **Operating profit** increased by 15 percent and amounted to SEK 743 million (649) corresponding to an operating margin of 12.9 percent (12.7).
- **Profit after tax** increased by 20 percent and amounted to SEK 543 million (451) and **earnings per share before/after dilution** amounted to SEK 1.95 (1.60).

FULL YEAR (1 APRIL 2024 - 31 MARCH 2025)

- **Net sales** increased by 9 percent and amounted to SEK 21,796 million (20,019).
- **Operating profit before amortisation of intangible non-current assets (EBITA)** increased by 14 percent and amounted to SEK 3,265 million (2,860) corresponding to an EBITA margin of 15.0 percent (14.3).
- **Operating profit** increased by 14 percent and amounted to SEK 2,757 million (2,426) corresponding to an operating margin of 12.6 percent (12.1).
- **Profit after tax** increased by 15 percent and amounted to SEK 1,940 million (1,691) and **earnings per share before/after dilution** amounted to SEK 7.00 (6.05).
- **Return on working capital (P/WC)** amounted to 76 percent (68).
- **Return on equity** amounted to 29 percent (28) and the **equity ratio** amounted to 38 percent (39).
- **Cash flow from operating activities** amounted to SEK 2,709 million (2,575). **Cash flow per share from operating activities** amounted to SEK 10.05 (9.55).
- **Since the start of the financial year twelve acquisitions have been completed** with combined annual sales of approximately SEK 1,600 million.
- The Board of Directors proposes a **dividend** of SEK 3.20 (2.80) per share.

CEO'S COMMENTS

Finishing strongly, we summarise a successful financial year for Addtech, with favourable performance among the companies generating conditions for continued profitable growth. Despite the uncertainty in the general business environment, the year has been characterised by a high level of activity, resulting in a sales increase of 9 percent, with organic growth in all quarters, earnings growth of 14 percent and a strengthened EBITA margin of 15.0 percent (14.3). With a high rate of acquisitions combined with the strength of our well-diversified business of entrepreneurial niche companies in strong positions, we have once again managed the challenges, while capturing the potential of the market in a highly satisfactory manner.

FOURTH QUARTER

Overall, the market situation strengthened somewhat in the fourth quarter, although variations remained between different customer segments. Total sales increased by 13 percent, of which 2 percent was organic, with solid contributions from four out of five business areas, with Energy showing the strongest sales trend and Automation the weakest. EBITA increased by 15 percent to SEK 880 million with an EBITA margin of 15.3 percent (15.0).

During the quarter, two acquisitions were completed; Italian Coel Motori S.r.l, which manufactures electric brake motors and patented brake modules, and German Rosho Automotive Solutions GmbH, which designs and configures safety and driver assistance systems based on camera technology.

FULL YEAR

Despite a generally subdued economic climate and differences in market conditions between different segments, overall customer activity remained stable at a high level over the year. With a clear focus on a favourable product mix, active pricing, and profitable acquisitions, we have created good growth and increased both our margins and profitability.

The market for infrastructure products for national and regional grids, as well as products and solutions for the defence and marine segments, has been strong and has also strengthened sequentially over the year. The overall business situation in the medical technology, electronics, wind power, and mechanical and process industry segments has remained at stable high levels. Building and installation, as well as data and telecommunications, excluding data halls, had a challenging year. The willingness to invest in new projects in the sawmill industry and demand for special vehicles, particularly construction machinery, remained weak.

From a geographical perspective, the market situation over the year was stable in Sweden and Denmark, weak in Finland and strong in Norway. In our primary markets outside the Nordic region, business conditions were weak in DACH, stable in the Benelux countries and generally favourable for our UK companies. Our sales outside the Nordic region continued to increase over the year and amount to about 40 percent of our total sales on a rolling 12-month basis.

Cash flow from operating activities strengthened from already high levels and amounted to SEK 2,709 million (2,575) for the full year, driven by continued earnings growth, a stronger operating margin and focus on efficient working capital, and our long-term financial target P/WC increased to 76 percent (68).

ACQUISITIONS

Over the financial year, we continued to acquire at a high rate, on own cash flow, high-performing companies that strengthen our niches. In total, twelve companies were welcomed to the Group, followed by two more after the end of the period, adding a total of approximately SEK 1,900 million and 405 new employees to the Group.

The share of acquisitions outside the Nordic region increased, accounting for nine out of twelve acquisitions over the year, or about 62 percent of the added sales. In early April, two more acquisitions were completed, Canadian Novatech Analytical Solutions Inc, which supplies analytical instrumentation and engineered systems for measuring gases and liquids to customers in the process and energy segments, and British AMP Power Protection Ltd, which develops, supplies and supports rugged uninterruptible power supplies (UPS) and power protection systems for harsh environments to the defence, marine and transport industries. Accordingly, we have again demonstrated that, as long as we safeguard a strategic and cultural match, we can successfully scale the business model based on our business units' niche strategies in selected geographic markets.

In general, we retain a positive view of the acquisition market and, with our strong financial position, increased interest in becoming part of Addtech and a well-filled pipeline, we are well placed to maintain a high pace over the current financial year.

OUTLOOK

We are entering the new financial year with favourable order intake, well-filled order books and an ambitious plan for continued growth. Although we experienced some improvement in market conditions towards the end of the year, the general market uncertainty for the upcoming quarters is high. The direct impact of the announced trade tariffs on us is currently marginal, while it is difficult to assess the indirect effects on economic trends and the impact on our customers' willingness to invest. At the same time, we are resilient and well-equipped for the future with a well-diversified business, comprising flexible and adaptable companies with strong positions in niches with good long-term demand driven by clear growth trends.

In conclusion, I would like to direct my heartfelt thanks to all of our skilled and committed employees. I now look forward to a new financial year continuing to build long-term and sustainable value.

Niklas Stenberg
President and CEO

GROUP DEVELOPMENT

Sales development

Net sales in the Addtech Group increased in the fourth quarter by 13 percent to SEK 5,750 million (5,091). The organic growth amounted to 2 percent and acquired growth amounted to 10 percent. Exchange rate changes affect net sales positively with 1 percent, corresponding to SEK 30 million.

Net sales in the Addtech Group during the financial year increased by 9 percent to SEK 21,796 million (20,019). The organic growth amounted to 2 percent and acquired growth amounted to 7 percent. Exchange rate changes affected net sales marginally negative, corresponding to SEK 84 million.

Profit development

EBITA in the fourth quarter amounted to SEK 880 million (763), representing an increase of 15 percent. Operating profit increased during the quarter by 15 percent to SEK 743 million (649) and the operating margin amounted to 12.9 percent (12.7). Net financial items amounted to SEK -39 million (-70) and profit after financial items increased by 22 percent to SEK 704 million (579).

Profit after tax in the fourth quarter increased by 20 percent and amounted to SEK 543 million (451) corresponding to earnings per share before/after dilution of SEK 1.95 (1.60).

EBITA for the financial year amounted to SEK 3,265 million (2,860), representing an increase of 14 percent. Operating profit increased during the financial year by 14 percent to SEK 2,757 million (2,426) and the operating margin amounted to 12.6 percent (12.1). Net financial items were SEK -242 million (-243) and profit after financial items increased by 15 percent to SEK 2,515 million (2,183).

Profit after tax for the financial year increased by 15 percent to SEK 1,940 million (1,691) and the effective tax rate amounted to 23 percent (23). Earnings per share before/after dilution for the financial year amounted to SEK 7.00 (6.05).

Net sales and EBITA margin, rolling 12 months

Sales per customer segment

Sales per geographic market

DEVELOPMENT IN THE BUSINESS AREAS

AUTOMATION

Net sales in Automation in the fourth quarter amounted to SEK 930 million (957) and EBITA amounted to SEK 106 million (132). Net sales during the financial year increased marginally and amounted to SEK 3,597 million (3,584) and EBITA amounted to SEK 428 million (459).

Market

The Automation business area experienced a weak end to the year, with a decline in sales mainly in companies with large-scale project-based operations and in companies with pure trading business in the DACH and Benelux countries. The decline in sales, combined with some non-recurring expenses, had a negative impact on the quarter's earnings and operating margin. On the whole, market conditions were weak in the medical technology and process industries, while they were stable against tough comparisons in the mechanical industry segment. Companies exposed to the defence industry continued to experience the strongest demand. The revaluation of contingent purchase considerations affected profit for the quarter positively by about SEK 5 million.

Sales per customer segment

Sales per geographic market

ELECTRIFICATION

Net sales in Electrification increased in the fourth quarter by 12 percent to SEK 1,159 million (1,040) and EBITA increased by 16 percent to SEK 157 million (135). Net sales during the financial year increased by 8 percent to SEK 4,419 million (4,100) and EBITA increased by 12 percent to SEK 577 million (514).

Market

The Electrification business area had a good fourth quarter with favourable demand and sales for the business area as a whole and an improved business situation compared with the final quarter last year. Demand was very strong in the medical technology, defence, special vehicles and mechanical industry segments, while it was stable for companies operating in electronics and energy. The revaluation of contingent purchase considerations affected profit for the quarter negatively by about SEK 1 million.

Sales per customer segment

Sales per geographic market

ENERGY

Net sales in Energy increased in the fourth quarter by 28 percent to SEK 1,637 million (1,276) and EBITA increased by 86 percent to SEK 264 million (142). Net sales during the financial year increased by 16 percent to SEK 6,147 million (5,307) and EBITA increased by 37 percent to SEK 935 million (683).

Market

The Energy business area enjoyed favourable market conditions and very good sales in the fourth quarter. The business situation was highly favourable for infrastructure products for the conversion and extension of national and regional grids, as well as for niche products for electrical transmission. Sales were varied in data and telecommunications, with the build-out of fiber-optic networks being weak, while sales to data halls remained strong. The market situation was weak in building and installation, stable for companies operating in the mechanical industry and favourable in wind power and traffic safety. The revaluation of contingent purchase considerations affected profit for the quarter negatively by about SEK 1 million.

Sales per customer segment

Sales per geographic market

INDUSTRIAL SOLUTIONS

Net sales in Industrial Solutions increased in the fourth quarter by 12 percent to SEK 1,042 million (930) and EBITA amounted to SEK 208 million (215). Net sales during the financial year increased by 6 percent to SEK 3,825 million (3,594) and EBITA increased by 6 percent to SEK 798 million (754).

Market

Over the quarter, the overall business situation was favourable for the Industrial Solutions business area. Sales were favourable, with acquisitions contributing to the positive trend. Although the overall market situation in the forestry and sawmill industries, as well as in special vehicles, primarily for construction machinery, remained weak, for our companies exposed to these segments, demand rose over the quarter compared with last year. Demand was weak in waste and recycling, while the market situation was stable for companies active in the mechanical industry segment and favourable in subsea.

Sales per customer segment

Sales per geographic market

PROCESS TECHNOLOGY

Net sales in Process Technology increased in the fourth quarter by 10 percent to SEK 991 million (899) and EBITA increased by 9 percent to SEK 155 million (143). Net sales during the financial year increased by 11 percent to SEK 3,837 million (3,464) and EBITA increased by 12 percent to SEK 555 million (498).

Market

For the Process Technology business area as a whole, the market situation was favourable in the fourth quarter, with good demand and sales. Demand was good in the marine and energy segments, as well as in medical technology the process industries, where our companies operating in water treatment and the chemicals industry in particular continued to perform well. The market situation was stable in special vehicles, while it was weak in the forest and mechanical industry segments. The revaluation of contingent purchase considerations affected profit for the quarter positively by about SEK 16 million.

OTHER FINANCIAL INFORMATION

Profitability, financial position and cash flow

The return on equity at the end of the financial year was 29 percent (28) and return on capital employed was 22 percent (22). Return on working capital P/WC (EBITA in relation to working capital) amounted to 76 percent (68).

At the end of the financial year the equity ratio amounted to 38 percent (39). Equity per share, excluding non-controlling interest, totalled SEK 24.55 (22.15). The Group's net debt at the end of the financial year amounted to SEK 5,018 million (4,427), excluding pension liabilities of SEK 262 million (241). The net debt/equity ratio, calculated on the basis of net debt excluding provisions for pensions amounted to 0.7 (0.7).

Cash and cash equivalents consisting of cash and bank equivalents and approved but non-utilised credit facilities amounted to SEK 2,472 million (2,167) at 31 March 2025.

Cash flow from operating activities amounted to SEK 2,709 million (2,575) during the financial year. Company acquisitions and disposals including settlement of contingent consideration regarding acquisitions implemented in previous years amounted to SEK 1,602 million (1,303). Investments in non-current assets totalled SEK 232 million (188) and disposal of non-current assets amounted to SEK 36 million (9). Repurchase of call options amounted to SEK 80 million (41). Exercised and issued call options totalled SEK 46 million (50). Dividend paid to the shareholders of the Parent Company totalled SEK 755 million (674), corresponding to SEK 2.80 (2.50) per share. The dividend was paid out in the second quarter.

Employees

At the end of the financial year, the number of employees was 4,470 compared to 4,175 at the beginning of the financial year. During the financial year, completed acquisitions resulted in an increase of the number of employees by 325. The average number of employees in the latest twelve month period was 4,341.

Ownership structure

At the end of the period the share capital amounted to SEK 51.1 million.

Class of shares	Number of shares	Number of votes	Percentage of capital	Percentage of votes
Class A shares, 10 votes per share	12,864,384	128,643,840	4.7%	33.1%
Class B shares, 1 vote per share	259,929,600	259,929,600	95.3%	66.9%
Total number of shares before repurchases	272,793,984	388,573,440	100.0%	100.0%
Repurchased class B shares	-2,931,912		1.1%	0.8%
Total number of shares after repurchases	269,862,072			

Addtech has four outstanding call option programmes for a total of 2,185,355 shares. Call options issued on repurchased shares entail a dilution effect of about 0.2 percent during the latest twelve month period. Addtech's own shareholdings fully meet the needs of the outstanding call option programmes.

Outstanding programme	Number of options	Corresponding number of shares	Proportion of total shares	Exercise price	Expiration period
2024/2028	639,925	639,925	0.2%	388.80	6 Sep 2027 - 9 Jun 2028

Acquisitions and disposal

During the period, 1 April to 31 December 2024 the following acquisitions were completed; Romani Components Srl, Italy, was acquired to become part of the Automation business area. Nuova Elettromeccanica Sud S.p.A., Italy, and Unilite A/S, Denmark, were acquired to become part of the Energy business area. Novomotec GmbH, Germany, Cell Pack Solutions Ltd., Great Britain, and Nanosystec GmbH, Germany, were acquired to become part of the Electrification business area. GoDrive AS, Norway, and C. Gunnarssons Verkstads AB, Sweden, were acquired to become part of the Industrial Solutions business area. Analytical Solutions and Products B.V., Netherlands, and PGS Tec GmbH, Germany, were acquired to become part of the Process Technology business area.

On 15 January, Coel Motori S.r.l., Italy, was acquired to become part of the Industrial Solutions business area. Coel is a manufacturer and supplier of electric break motors and patented brake modules for industrial applications in the European market. Coel has 24 employees and sales of around EUR 8 million.

On 14 February, 80 percent of the shares in ROSHO Automotive Solutions GmbH, Germany, was acquired to become part of the Industrial Solutions business area. ROSHO designs and configures innovative safety and assistance systems based on camera technology. The products and systems are sold under the ROSHO brand to vehicle manufacturers, mainly in the public transport segment, on the European market. ROSHO has 24 employees and a sales of around EUR 13 million.

The purchase price allocation calculations for the acquisitions completed during the period 1 April 2023 - 31 March 2024 have now been finalised. No significant adjustments have been made to the calculations. Acquisitions completed as of the 2023/2024 financial year are distributed among the Group's business areas as follows:

Acquisitions 2023/2024	Closing	Acquired share, %	Net sales, SEKm*	Number of employees*	Business Area
INDAG Maschinenbau GmbH, Germany	April, 2023	90	55	40	Process Technology

Novatech Analytical Solutions Inc., Canada	April, 2025	90	260	60	Process Technology

* Refers to assessed condition at the time of acquisition on a full-year basis.

If all acquisitions which have taken effect during the financial year had been completed on 1 April 2024, their impact would have been an estimated SEK 1,650 million on Group net sales, about SEK 210 million on operating profit and about SEK 145 million on profit after tax for the period.

Addtech normally employs an acquisition structure comprising basic purchase consideration and contingent consideration. The outcome of contingent purchase considerations is determined by the future earnings reached by the companies and is subject to a fixed maximum level. Of considerations not yet paid for acquisitions during the financial year, the discounted value amounts to SEK 230 million. The contingent purchase considerations fall due for payment within three years and the outcome is subject to a maximum of SEK 277 million.

Transaction costs for acquisitions that resulted in an ownership transfer during the financial year amounted to SEK 24 million (26) and are reported under Selling expenses.

Revaluation of contingent consideration had a positive net effect of SEK 11 million (15) during the financial year. The impact on profits is reported under Other operating income and Other operating expenses, respectively.

According to the preliminary acquisitions analyses, the assets and liabilities included in the acquisitions were as follows, during the financial year:

Fair value		
SEKm	31 Mar 2025	31 Mar 2024
Intangible non-current assets	985	727
Other non-current assets	98	127
Inventories	335	156
Other current assets	616	425
Deferred tax liability/tax asset	-267	-186
Other liabilities	-532	-284
Acquired net assets	1,235	965
Goodwill ¹⁾	989	722
Non-controlling interests ²⁾	-163	-105
Consideration ³⁾	2,061	1,582
Less: cash and cash equivalents in acquired businesses	-343	-220
Less: consideration not yet paid	-247	-254
Effect on the Group's cash and cash equivalents	1,471	1,108

1) Goodwill is justified by expected future sales trend and profitability as well as the personnel included in the acquired companies.

2) Non-controlling interests have been measured at fair value, which entails that goodwill is also reported for non-controlling interests.

3) The consideration is stated excluding transaction costs for the acquisitions.

Parent Company

Parent Company's net sales during the financial year amounted to SEK 112 million (95) and profit after financial items was SEK 806 million (687). Net investments in non-current assets were SEK 0 million (0). The Parent Company's financial net assets was SEK 648 million (-189) at the end of the financial year.

OTHER DISCLOSURES

Accounting policies

The interim report has been prepared in accordance with IFRS as adopted by the EU, with IAS 34 Interim Financial Reporting being applied. Apart from in the financial statements and their accompanying notes, disclosures in accordance with IAS 34.16A also appear in other parts of the interim report. The interim report for the Parent Company has been prepared in accordance with the Annual Accounts Act and the Securities Market Act, which is in accordance with the provisions of RFR 2 Accounting for Legal Entities.

In the interim report, the same accounting principles and bases of calculation have been applied as in the most recent annual report. There are no new IFRS or IFRIC pronouncements endorsed by the EU that are applicable for Addtech or that have a significant impact on the Group's result of operations and position in 2024/2025.

Alternative performance measures

The Company presents certain financial measures in the interim report that are not defined according to IFRS. The Company believes that these measures provide valuable supplemental information to investors and the Company's management as they allow for evaluation of trends and the Company's performance. Since all companies do not calculate financial measures in the same way, they are not always comparable to measures used by other companies. These financial measures should therefore not be considered to be a replacement for measurements as defined under IFRS. For definitions and reconciliation tables of the performance measures that Addtech uses, please see page 21-24.

Risks and factors of uncertainty

Addtech's profit and financial position, as well as its strategic position, are affected by a number of internal factors under Addtech's control and by a number of external factors over which Addtech has limited influence. The risk factors of greatest significance to Addtech are the economic situation, or other events affecting the economy, such as the geopolitical situation, in combination with structural changes and the competitive situation.

Please see section Risks and uncertainties (page 58-61) in the annual report for 2023/2024 for further details.

The Parent Company is indirectly affected by the above risks and uncertainty factors due to its role in the organisation.

Transactions with related parties

No transactions between Addtech and related parties that have significantly affected the Group's or the parent company's position and its earnings have taken place during the period.

Seasonal effects

Addtech's sales of high-tech products and solutions in the manufacturing industry and infrastructure are not subject to major seasonal variations. The number of production days and customers' demand and willingness to invest can vary over the quarters.

Annual Report 2024/2025

The annual report for 2024/2025 will be published on Addtech's website www.addtech.com during week 27 in July 2025. A printed version will be distributed to the shareholders who request this.

Annual General Meeting 2025

The Annual General Meeting (AGM) of Addtech AB will take place at 4:00 p.m on Wednesday 27 August 2025. A notice of the AGM will be published in July 2025 and will also be available on www.addtech.com.

The Board of Directors proposes dividend of SEK 3.20 (2.80) per share, which corresponds to a dividend payment of about SEK 864 million (755), which is in line with Addtech's dividend policy with the objective of a dividend that exceeds 30 percent of average Group profit after tax over a business cycle.

Events after the end of the period

On 1 April, AMP Power Protection Ltd., Great Britain, was acquired to become part of the Electrification business area. AMP develops, supplies and supports rugged Uninterruptible Power Supplies (UPS) and Power Protection systems for harsh environments to the defence, marine and transport industries. AMP has 20 employees and sales of around GBP 5 million.

On 1 April, 90 percent of the shares in Novatech Analytical Solutions Inc., Canada, was acquired to become part of the Process Technology business area. Novatech is a leading supplier of analytical instrumentation, engineered systems and services including the measurement of gases and liquids for process, environmental and ambient detection - primarily to Canadian customers within the process- and energy segments. Novatech has 60 employees and sales of around CAD 34 million.

Preliminary purchase price allocations have not yet been completed.

Derivatives - fair value, hedge instruments	-	-	-	-	-	-
Derivatives - fair value through profit	14	14	-	20	20	-
Contingent considerations - fair value through profit	451	-	451	360	-	360
Total financial liabilities at fair value per level	465	14	451	380	20	360

The fair value and carrying amount are recognised in the balance sheet as shown in the table above.

For quoted securities, the fair value is determined on the basis of the asset's quoted price in an active market, level 1.

As of the reporting date the Group had no items in this category.

For currency contracts and embedded derivatives, the fair value is determined on the basis of observable market data, level 2.

For contingent considerations, a cash-flow-based valuation is performed, which is not based on observable market data, level 3.

For the Group's other financial assets and liabilities, fair value is estimated to be the same as the carrying amount.

Contingent considerations	31 Mar 2025	31 Mar 2024
Opening balance	360	295
Acquisitions during the year	231	251
Adjustments through profit or loss	-11	-15

Current liabilities	3,392	2,892
Total equity and liabilities	9,554	8,015

DEFINITIONS

Return on equity^{1 2}

Earnings after tax divided by equity. The components are calculated as the average of the last 12 months.
Return on equity measures the return generated on owners' invested capital.

Return on working capital (P/WC)¹

EBITA divided by working capital.

P/WC is used to analyse profitability and is a measure that encourages high EBITA and low working capital requirements, see the reconciliation table on page 24.

Return on capital employed¹

Profit after financial items plus financial expenses as a percentage of capital employed. The components are calculated as the average of the last 12 months.

Return on capital employed shows the Group's profitability in relation to externally financed capital and equity, see the reconciliation table on page 24.

EBITA¹

Operating profit before amortisation of intangible assets.

EBITA is used to analyse the profitability generated by operating activities, see reconciliation table on page 24.

EBITA-margin¹

EBITA as a percentage of net sales.

EBITA-margin is used to show the degree of profitability in operating activities.

EBITDA¹

Operating profit before depreciation and amortisation.

EBITDA is used to analyse the profitability generated by operating activities, see reconciliation table on page 24.

Equity per share¹

Equity divided by number of shares outstanding at the reporting period's end.

This measures how much equity is attributable to each share and is published to make it easier for investors to conduct analyses and make decisions.

Financial net debt¹

The net of interest-bearing debt and provisions minus cash and cash equivalents.

Net debt is used to monitor changes in debt, analyse the Group indebtedness and its ability to repay its debts using liquid funds generated from the Group's operating activities if all debt fell due for repayment today and any necessary refinancing.

Financial net debt/EBITDA¹

Net financial debt divided by EBITDA.

Net financial debt compared with EBITDA provides a performance measure for net debt in relation to cash-generating earnings in the business, i.e. it gives an indication of the business' ability to repay its debts. This measure is generally used by financial institutions to measure creditworthiness.

Financial items¹

Financial income minus financial costs.

Used to describe changes in the Group's financial activities.

Acquired growth¹

Changes in net sales attributable to business acquisitions compared with the same period last year.

Acquired growth is used as a component to describe the change in consolidated net sales in which acquired growth is distinguished from organic growth, divestments and exchange rate effects, see reconciliation table on page 24.

Cash flow from operating activities per share¹

Cash flow from operating activities, divided by the average number of outstanding shares after repurchase.

This measure is used so investors can easily analyse the size of the surplus generated per share from operating activities.

Net investments in non-current assets¹

Investments in non-current assets minus sales of non-current assets.

This measure is used to analyse the Group's investments in renewing and developing property, plant and equipment.

Net debt excluding pensions¹

The net of interest-bearing debt and provisions excluding pensions minus cash and cash equivalents.

A measure used to analyse financial risk, see reconciliation table on page 24.

Net debt excluding pensions/ equity ratio^{1 2}

Net debt excluding pensions divided by shareholders' equity.

A measure used to analyse financial risk, see reconciliation table on page 24.

Organic growth¹

Changes in net sales excluding currency effects, acquisitions and divestments compared with the same period last year.

Organic growth is used to analyse underlying sales growth driven by change in volumes, product range and price for similar products between different periods, see reconciliation table on page 24.

Profit after financial items¹

Profit/loss for the period before tax.

Used to analyse the business' profitability including financial activities.

Earnings per share (EPS)

Shareholders' share of profit for the period after tax, divided by the weighted average number of shares during the period.

Earnings per share (EPS), diluted

Shareholders' share of profit for the period after tax, divided by the weighted average number of shares during the period, adjusted for the additional number of shares in the event of outstanding options being used.

Interest coverage ratio¹

Earnings after net financial items plus interest expenses and bank charges divided by interest expenses and bank charges.

This performance indicator measures the Group's capacity through its business operations and financial income to generate a sufficiently large surplus to cover its financial costs, see reconciliation table on page 24.

Working capital¹

Working capital (WC) is measured through an annual average defined as inventories plus accounts receivable less accounts payable.

Working capital is used to analyse how much working capital is tied up in the business, see reconciliation table on page 24.

Operating margin¹

Operating profit as a percentage of net sales.

This measure is used to specify the percentage of sales that is left to cover interest and tax, and to provide a profit, after the company's costs have been paid.

Operating profit¹

Operating income minus operating expenses.

Used to describe the Group's earnings before interest and tax.

Debt/equity ratio^{1 2}

Financial net liabilities divided by equity.

A measure used to analyse financial risk.

Equity ratio^{1 2}

Equity as a percentage of total assets.

The equity/assets ratio is used to analyse financial risk and show the percentage of assets that are funded with equity.

Capital employed¹

Total assets minus non-interest-bearing liabilities and provisions.

Capital employed shows the size of the company's assets that have been lent out by the company's owners or that have been lent out by lenders, see reconciliation table on page 24.

Outstanding shares

Total number of shares less treasury shares repurchased by the Company.

¹The performance measure is an alternative performance measure according to ESMA's guidelines.

²Minority interest is included in equity when the performance measures are calculated.

RECONCILIATION TABLES ALTERNATIVE PERFORMANCE MEASURES

EBITA and EBITDA		12 months ending

This is Addtech

Addtech is a Swedish, listed technical solutions group that combines the flexibility and speed of a small company with the resources of a large company. We acquire, own and develop independent subsidiaries that sell various high-tech products and solutions to customers, primarily within the manufacturing industry and infrastructure. With in-depth expertise in a number of different niches, our subsidiaries generate added technical, financial and sustainable value for customers and suppliers alike, thus helping increase the efficiency and competitiveness of all involved. We currently own more than 150 companies in about 20 countries, and have a long history of sustainable, profitable growth.

Our vision

We are to be the leader in value-creating technical solutions for a sustainable tomorrow, perceived as the most skilled and long-term partner of our customers, suppliers and employees.

Business concept in brief

Addtech offers high-tech products and solutions for companies in the manufacturing and infrastructure sectors. Addtech contributes with added technical and financial value by being a skilled and professional partner for customers and manufacturers.

We build shareholder value through:

- our 150 subsidiaries and their capacity to generate earnings growth
- corporate governance that ensures the companies achieve even better results and development
- acquisitions that bring in new employees, customers and suppliers
